PROJECTS

**MINIMAL - Interior Designing**

FullStack Project : 01/23 - 09/23

It is a website about home interior designing. As the name suggest my website looks simple and elegant. People are currently compelled to live in crowded conditions in filthy homes as a result of a high population. They are unsure of how to make their home's little space more lively. Since clients can schedule an appointment with a designer on my website. On my website, I also assist independent designers in advancing their careers.

EDUCATION
