- HackerRank Java Basic
- HackerRank SQL Basic
- HackerRank JS Basic

PROJECTS

MINIMAL - Interior Designing

FullStack Project : 01/23 - 09/23

It is a website about home interior designing. As the name suggest my website looks simple and elegant. People are currently compelled to live in small homes as a result of a high population. They are unsure of how to make their home space more lively. On my website clients can schedule an appointment with a designer to decorate their homes. I also assist independent designers in advancing their careers by connecting them with clients.
